Scope

In Scope

- The app will be able to notify the user of:
  - Upcoming checkups/appointments
  - Reminders to take medicine/meals
- The app will keep track of:
  - Health restrictions during recovery progress
    - Ex: Dietary restrictions, physical activities
  - Past test results in regard to current recovery
  - Current rate of recovery

Out of Scope

- The app will not:
  - Diagnose the user
  - Order or change pharmaceutical medications differing from original prescription
  - Allow for real-time interactions with physicians/doctors
  - Integrate with medical devices for automatic test result scoring
